DATASHEET / LIST

ISO BOM / MTO Generator

Aggregates BOM/MTO from E3D · SP3D · PDS isometrics and support drawings, exporting to Excel. Unified RUNALL + shared UI theme.

Key Purpose

Why this program

1. **One tool for every isometric source**

   – E3D ISO, SP3D ISO, PDS ISO and Support drawings all read by a single picker

   → **Effect:** No need to remember or launch four separate BOM scripts — one window covers the whole plant regardless of CAD origin

2. **Batch DXF/DWG to Excel BOM in one click**

   – Select many drawings, choose the BOM type, press Apply — the matching extractor runs in-memory on the whole batch

   → **Effect:** Material take-off that used to be manual counting becomes a few seconds of automated aggregation, with no transcription error

3. **Results ready to open on the spot**

   – Generated .xlsx files are detected automatically and listed; select one and press Open

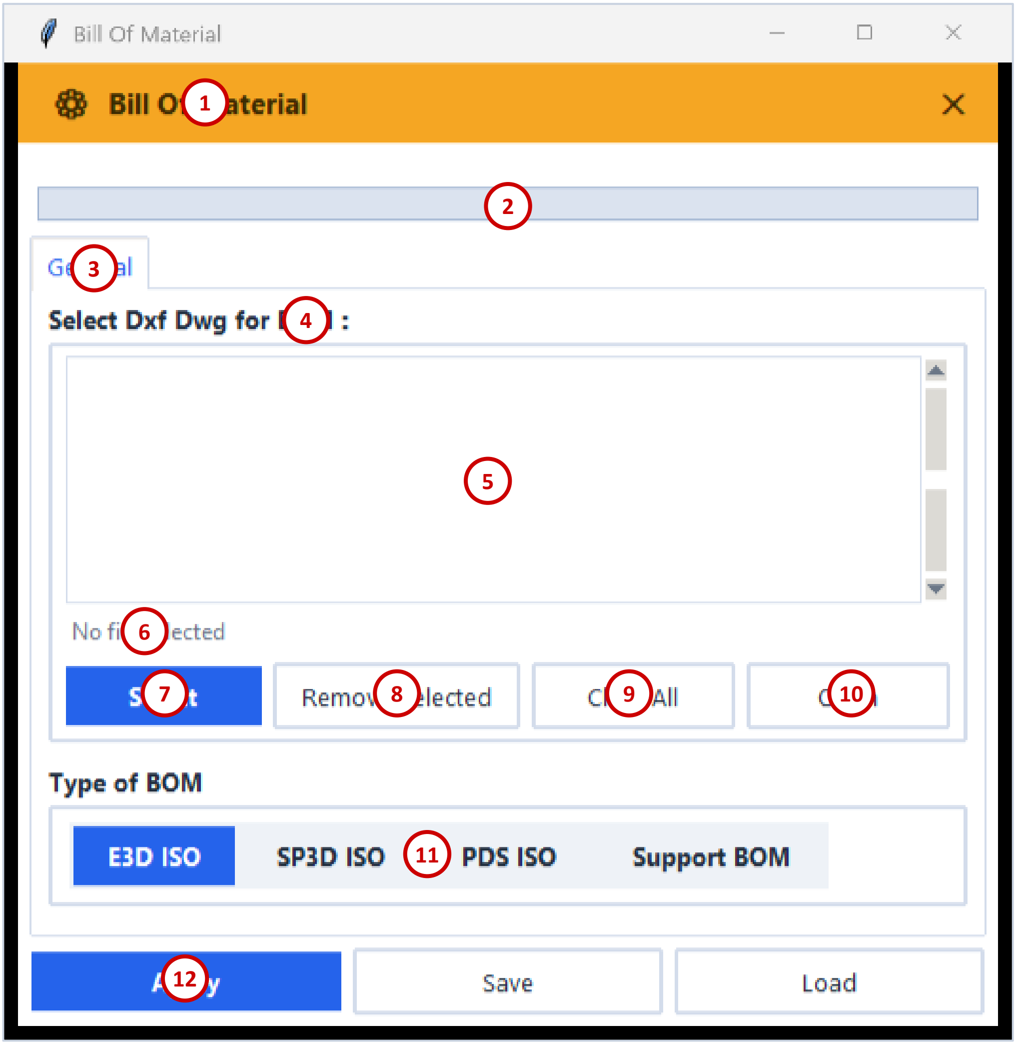
   → **Effect:** The engineer sees and opens the finished BOM without hunting through folders

4. **Reusable option sets**

   – Save/Load remembers the chosen files and BOM type

> **Required inputs :** One or more isometric / support DXF (DWG) drawings + a BOM type (E3D / SP3D / PDS / Support)

Main Window – Item Guide



1. Title bar — Bill Of Material
2. Progress bar (batch status)
3. General tab
4. Select Dxf Dwg for BOM — section
5. Selected drawings / generated files list
6. File count status (No file selected)
7. Select — add DXF drawings
8. Remove Selected
9. Clear All
10. Open — open highlighted file
11. Type of BOM — E3D / SP3D / PDS / Support
12. Apply — run BOM; Save / Load options

Overview

What it does

1. Aggregates BOM/MTO from E3D
2. SP3D
3. PDS isometrics and support drawings
4. Exporting to Excel
5. Unified RUNALL
6. Shared UI theme

Category: Datasheet / List
Folder: MTO
Main scripts: bom_runall.py
Scripts / Status: 6 scripts · Operational
Tags: MTO · BOM · ISO · Excel

WELDING BOM AUTO GEN FROM ISO DWG - MAT CS

Notes & Information

■ Part of the in-house Plant Engineering automation suite — category: Datasheet / List.

■ Runs offline as a pure-Python / Tkinter tool; portable across PCs via OneDrive sync (needs Python + packages).

■ Launch from the PC launcher (런처.bat) or run the main script: bom_runall.py.

■ Output samples and the program window above reflect the current build.

Thank You
